

TECHNICAL DATA SHEET

Healthy Hooves ECO™ HH 108

Revision Date: 18/02/2020

Product Description

Healthy Hooves Eco™ HH 108 the ALL IN ONE pack solution which contains a unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. Proven in field trials on farms, Healthy Hooves Eco™ HH 108 has shown to provide a consistently effective footbath life throughout the processing of up to 800 ewes per 100 litre footbath, major benefit contains mineral chelate which enables the product to work without the addition of zinc sulphate, and can be used in auto fill footbaths if required.

Benefits

1. Sustains active mineral chelate levels.
2. Safe & Easy to use for both the operator and the environment.
3. All in one product just dilute with water
4. Reduces heavy metal in the slurry.
5. Excellent antiseptic properties. Contains Tea Tree Oil.
6. Dissolves Zinc Sulphate easily if added.

Properties

Form:	Liquid
Specific Gravity:	1.010-1.035
Colour:	Blue
Odour:	Faint
Solubility:	Complete in water
pH (Neat):	<2.0
pH 1% in solution H ₂ O	N/A

Method of Use

Healthy Hooves Eco™ HH 108 is used between 4% and 2% by volume. A typical dilution is 2 litres of Healthy Hooves Eco™ HH 108 with 100 litres of water. A 2% dilution allows for an effective solution. Add 1% of Zinc Sulphate to the footbath as a separate product. If required, This allows for a maximum of 800 ewe passes per 100 litre footbath.

Process of Use

Healthy Hooves Eco™ HH 108 should be used as follows for the best results:
Use Healthy Hooves Eco™ HH 108 at 4% footbath for four consecutive days, for initial use.
Use Healthy Hooves Eco™ HH 108 at 2% footbath as and when required to, for ongoing use.
Use Healthy Hooves Eco™ HH 108 at 4% apply daily as and when required to, for spray applications.

Packaging

20 litre drums.
200 litre drums.
1000 litre drums.
