

TECHNICAL DATA SHEET

Healthy Hooves® Parlour Spray HH 106

Revision Date: 18/02/2020

Product Description

Healthy Hooves® Parlour Spray HH 106 contains mineral chelate, alongside the unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. These sustainable ions bond (chelate) the minerals to keep them in solution, preventing precipitation. In field trials on farms, Healthy Hooves® Parlour Spray HH 106, has shown to be a consistent and effective method in maintaining hoof health within the adopted farm hoof care protocols. Healthy Hooves® Parlour Spray HH 106 was developed for use in manual & automatic parlour spray systems for daily direct application to the hooves, where it is impractical to make up solutions prior to use.

Benefits

1. Sustains active mineral chelate levels.
2. Contains Tea Tree Oil for added cleansing
3. Safe to use for both the operator and the environment.
4. Reduces hazardous waste in the slurry.
5. Suitable for use in a wide range of manual and automatic spray systems.

Properties

Form:	Liquid
Specific Gravity:	1.010-1.035
Colour:	Aqua / green
Odour:	Faint
Solubility:	Complete in water
pH (Neat):	<2.6
pH 1% in solution H ₂ O	2.6 to3.0

Method of Use

Healthy Hooves® Parlour Spray HH 106 is used at 50% by volume, when introducing the product on farm after an introduction period of using for daily milking's per week for 4 weeks and thereafter use every other day

Please note the products is used in conjunction with existing hoof care protocol.

Packaging

- 20 litre drums.
- 200 litre barrels.
- 1,000 litre IBCs.
